Hyderabad, India | keerthanapatil17@gmail.com | +91 7995732076
linkedin.com/in/sai-keerthana1703 | github.com/Patil1703

EDUCATION

ICFAI Foundation of Higher Education, Hyderabad, India

B.Tech in Computer Science (AI & Data Science) | Aug 2022 – May 2026

St. Andrew's High School (CBSE), Hyderabad | Senior Secondary | Aug 2019 – May 2021

St. Ann's High School (ICSE), Hyderabad | Secondary | May 2019

SKILLS

Programming: Python, Java, R, C/C++ — beginner to intermediate; able to read, understand, and work with AI-assisted code

Web & Database: HTML/CSS/JavaScript, Bootstrap, MySQL — foundational to intermediate level

Cybersecurity: OWASP Top 10, MITRE ATT&CK; framework, port scanning (Nmap, Masscan), basic networking concepts, general threat awareness and security principles

GRC Foundations: Risk identification, risk management basics, compliance concepts, governance fundamentals, asset management, NDAs, regulatory and client compliance — exposure through internship

OS & Scripting: Linux (comfortable with daily use and Bash scripting at a foundational level)

Tools & Frameworks: Git, Docker, Streamlit, Flask, Agile — familiar and have used in project contexts

Certifications: Microsoft AI-900, Cybersecurity & Privacy, Practical Cybersecurity, Privacy and Security in Social Media, Internship on Ethical Hacking and Penetration Testing (Razz Security)

Languages: English, Hindi, Kannada, Telugu

EXPERIENCE

Security Engineer Intern

Appfend, Dublin (Remote) | Jan 2026 – Present

- Contributed to web application security tasks with a focus on OWASP Top 10 vulnerabilities — identifying and documenting common issues such as injection flaws, broken authentication, and security misconfigurations.
- Gained foundational exposure to GRC concepts including risk identification, risk management frameworks, compliance requirements, governance structures, asset management, and NDA/regulatory obligations.
- Participated in discussions on security architecture and secure development practices alongside the engineering team.

Cybersecurity Intern

Eficens Systems, Hyderabad, India | Jun 2025 – Dec 2025

- Performed network reconnaissance using Nmap and Masscan to identify open ports and exposed services as part of supervised vulnerability assessment exercises.
- Studied the MITRE ATT&CK; framework and applied it to understand attacker tactics, techniques, and procedures (TTPs) in real-world threat scenarios.
- Assisted in reviewing system logs and documenting findings to support the security team's detection workflows.

Founder – TheCyberDelta

Mumbai, India (Remote) | Feb 2022 – Feb 2024

- Built and grew a cybersecurity awareness blog to 5K+ monthly views through SEO and targeted content campaigns.
- Mentored a team of 6 interns, producing 50+ articles on digital safety, penetration testing concepts, and threat prevention.

Web Development Intern

Unified Mentor, Delhi, India (Remote) | Jun 2024 – Aug 2024

- Developed and deployed 3 full-stack web applications using Flask, MySQL, and Docker with secure authentication and responsive UI.
- Improved application performance by optimising back-end queries and caching strategies within an Agile workflow.

PROJECTS

URL Shortening Web App — Flask, SQLite

- Built a URL shortener with an analytics dashboard, click tracking, and QR code generation. Secured against HTML injection and duplicate entries; validated by 100+ testers tracking 1,000+ clicks.

AI-Powered Phishing Detection (PhishMap) — Python, ML, Flask

- Developed a machine-learning-based phishing URL detection system using features such as SSL certificates, domain age, and URL structure. Achieved 92% detection accuracy with Random Forest and deployed a real-time Flask dashboard.

Linux Security Auditing — Bash, Masscan

- Worked on automating CIS benchmark compliance checks on Debian/RHEL systems using custom Bash scripts. Performed basic vulnerability reconnaissance with Masscan; project partially completed as a learning exercise.

LEADERSHIP & ACTIVITIES

- Team Leader, Smart India Hackathon 2024 – Led a 6-member team to deliver a working prototype and present to a national jury.
- Team Leader, CipherCop 2025 – Led the cybersecurity competition team to a Top 5 finish in threat analysis and secure system design.
- President, Game Development Club – Organised 5+ workshops and hackathons with 150+ participants; mentored peers in programming, UI/UX, and security.
- Cybersecurity Mentor – Guided 6 interns at TheCyberDelta on technical research and security awareness content creation.
